## INDUSTRIAL ELECTRICAL ENGINEER (M/F)

### Beschreibung

We are looking for a motivated and versatile Industrial Electrical/Mechanical Engineer to join our team. Based mainly in our Millery workshop, you will also work on sites in France and abroad.

Your role will consist of wiring, installing, and maintaining industrial electro-mechanical equipment, while ensuring compliance with safety and quality standards.

### Zuständigkeiten / Hauptaufgaben

- Wiring and assembly of electrical cabinets in the workshop.
- Reading and interpreting electrical diagrams.
- Mechanical assembly of industrial equipment.
- On-site customer visits for installation, commissioning, and troubleshooting.
- Collaboration with project teams and automation engineers.
- Writing reports in English.
- Ensuring compliance with quality and safety standards.

### Qualifikationen / Anforderungen

Education: Vocational baccalaureate, BTS or equivalent in electricity, electrical engineering, or industrial maintenance.

- Technical skills:
  - Ability to read and understand electrical diagrams (essential).
  - Wiring of electrical cabinets and mechanical assembly.
  - Knowledge of industrial automation (a plus).
- Languages: Working knowledge of English required (reading, writing, speaking).

Personal qualities: Rigorous, independent, team player, willing to travel occasionally.

### Leistungen der Anstellung

We offer:

- A dynamic and innovative work environment.
- A variety of industrial projects in the workshop and on site.
- Ongoing training on our products and technologies.
- Attractive compensation based on profile and experience.
- Opportunities to travel in France and internationally.
