## Site Manager – Electricity & Industrial Mechanics

### Description

We are looking for a Tunisian Site Manager who is passionate about their work, rigorous, and experienced in the field of electricity and industrial mechanics. This position involves frequent travel abroad, with extended periods away from family. It is therefore suited to a motivated, stable individual who is able to thrive in a demanding international environment.

### Responsibilities

- Supervise and coordinate technical teams on site.
- Read and interpret electrical diagrams and mechanical plans.
- Carry out wiring, assembly, and commissioning operations.
- Ensure compliance with safety and quality standards and deadlines.

### Qualifications

- Proven experience in electrical and industrial mechanics.
- Excellent skills in site management and team supervision.
- Fluency in English (spoken and written) is mandatory.
- Autonomy, sense of responsibility, and ability to handle pressure.

### Job Benefits

- Attractive remuneration, designed to compensate for being away from your family and recognize the value of your skills.
- An international work environment, rich in ambitious technical projects.
- A job you'll love, where commitment, technical expertise, and a job well done are at the heart of what you do.
- Opportunities for advancement, with the possibility of managing larger projects or taking on more responsibility within the group.
- Personal and professional support to help you settle in and ensure your personal and family fulfillment.
